Avg AI Adoption Rate

30.6%

across all 16 quarters

GenAI Era Adoption Lift

+18.2%

20.4% → 38.6% post-Q4 2022

Developed-Emerging Adoption Gap

+0.8%

30.98% vs 30.22%, nearly flat

High Confidence Record Share

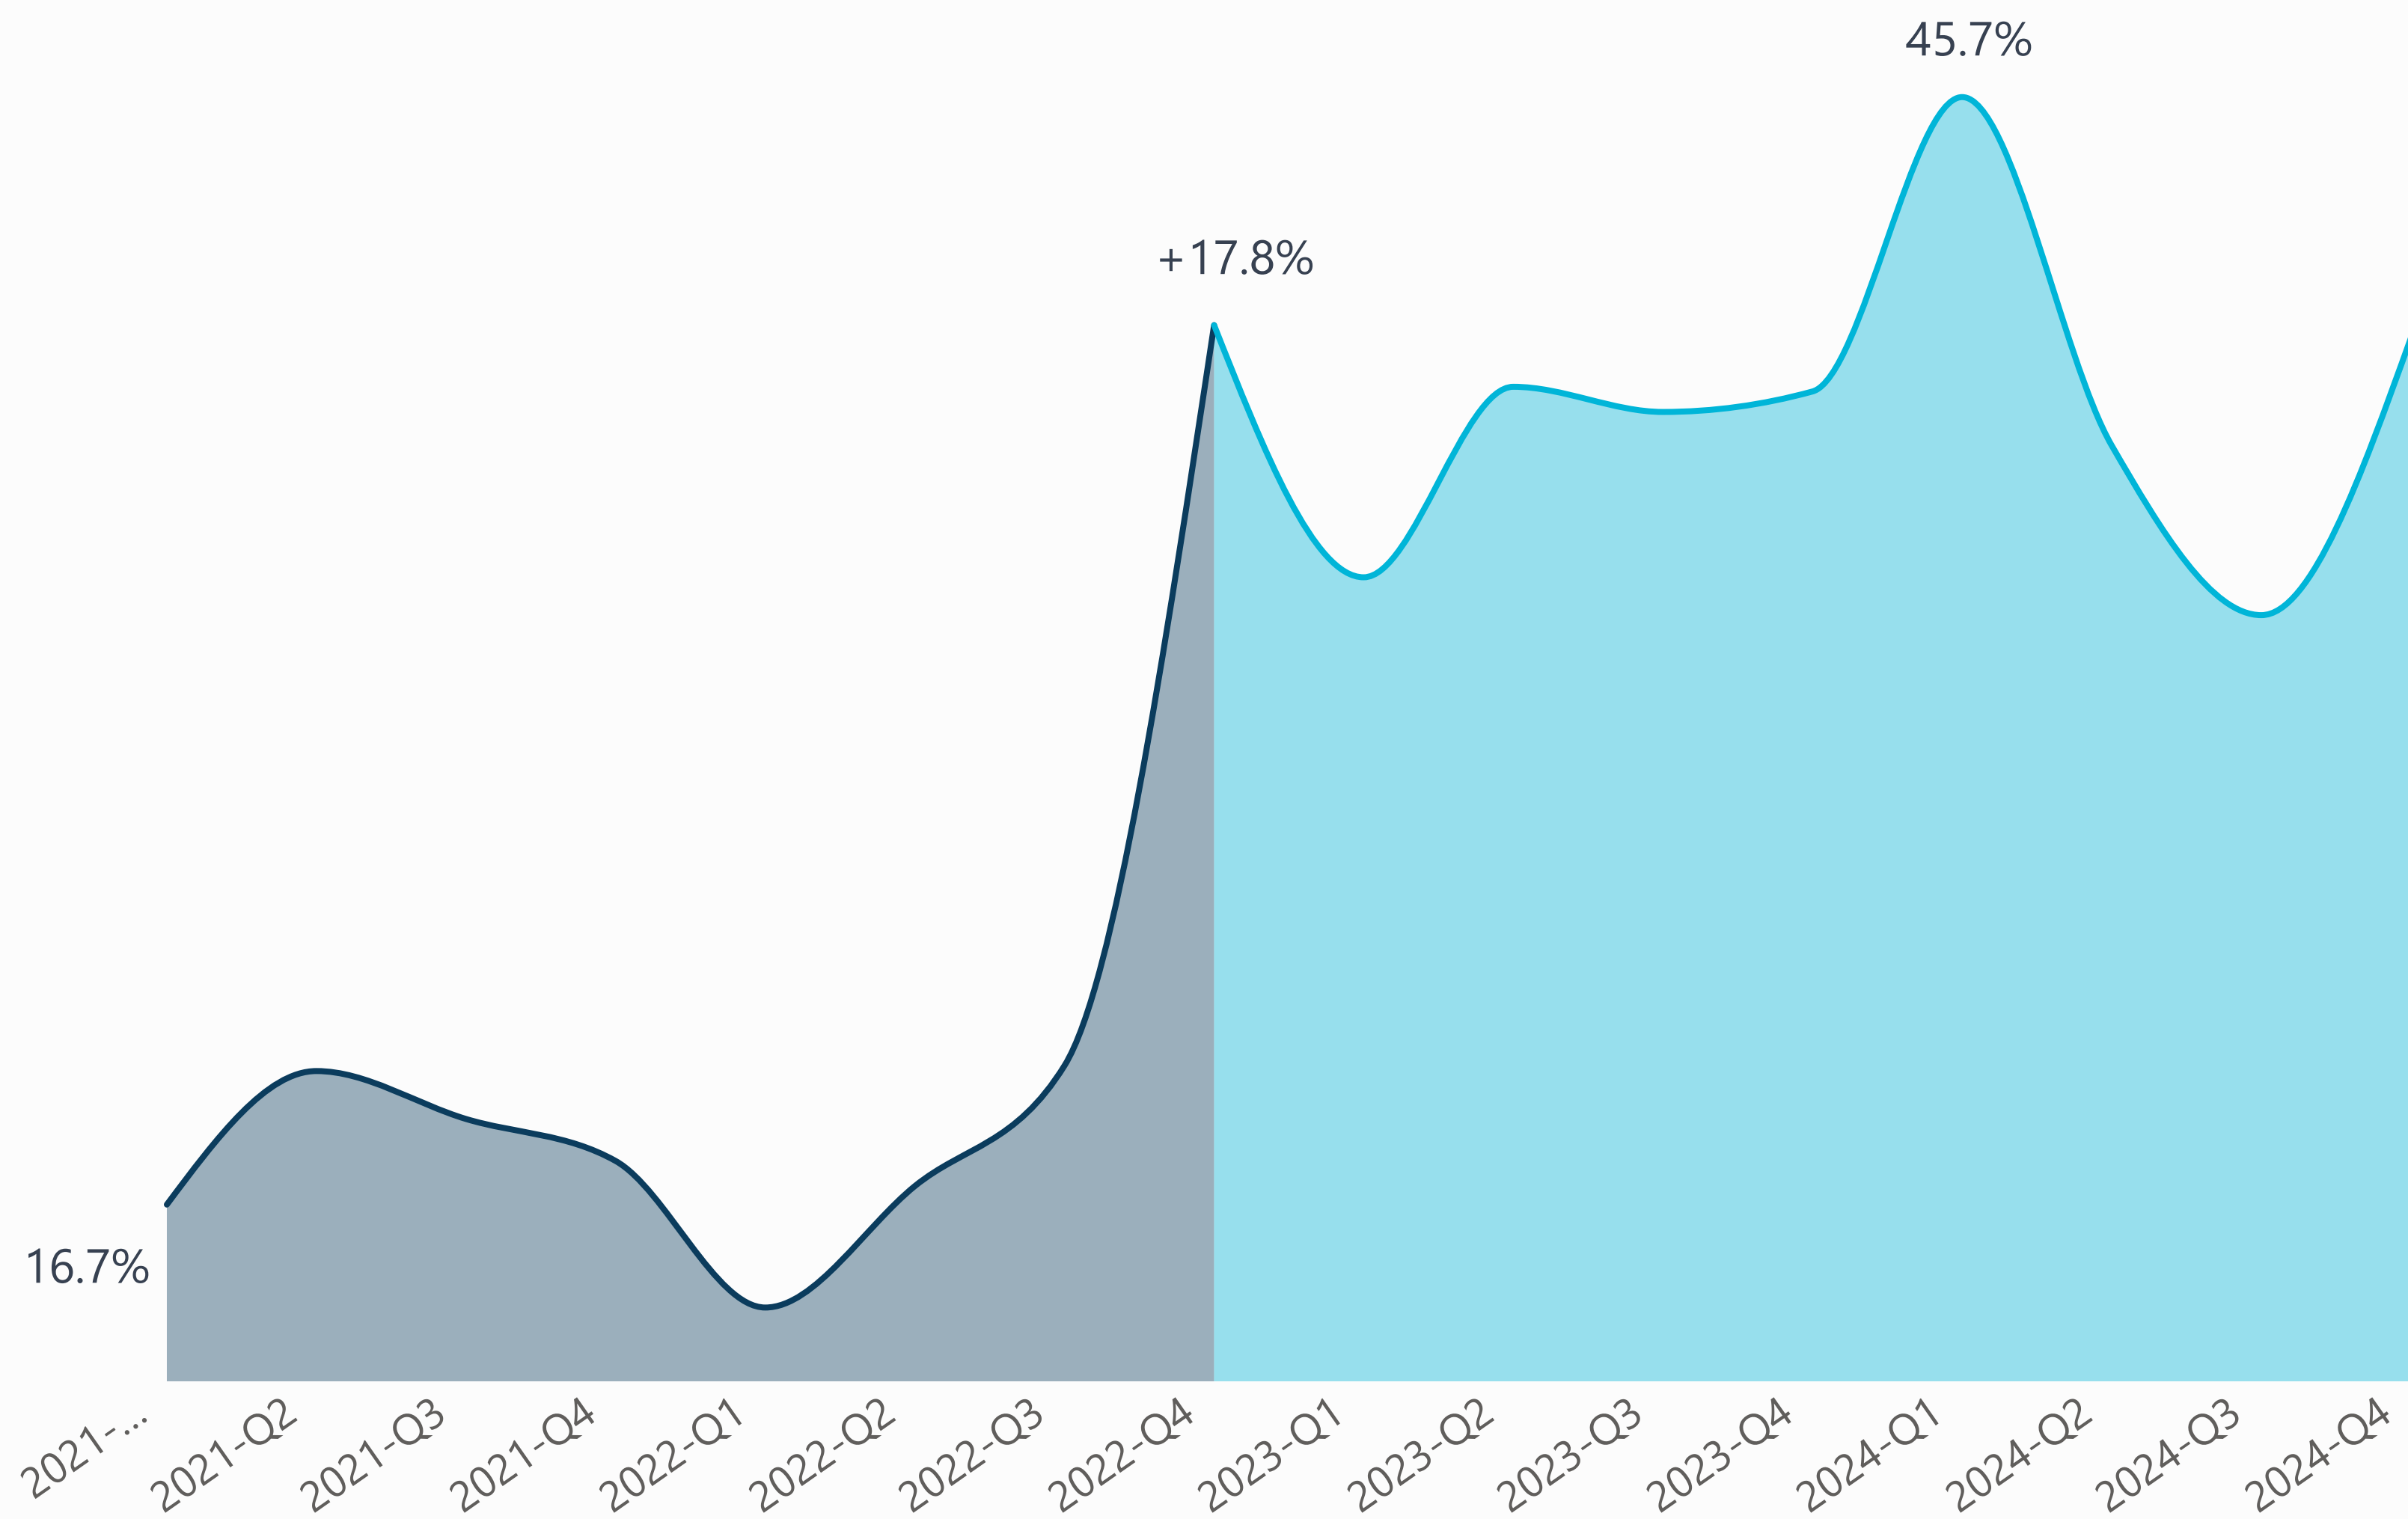

80%

240 of 300 records ≥ 0.7

How has AI adoption moved since generative AI arrived?

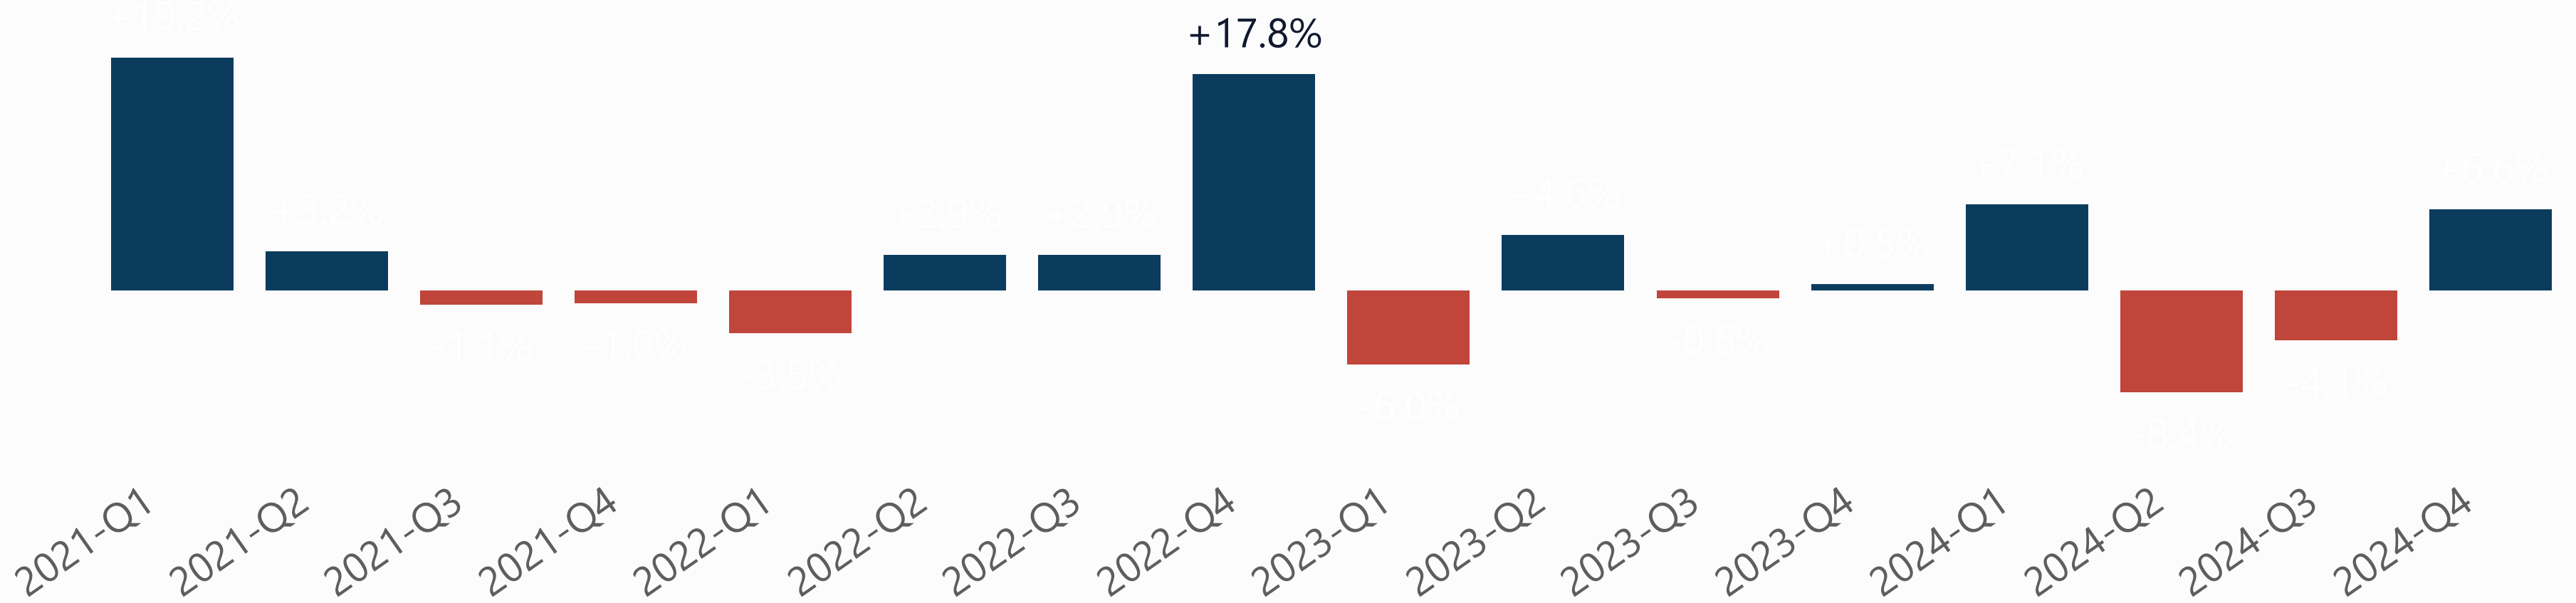

The steepest move in the whole series happens in one quarter, right at the GenAI boundary.

● Pre-GenAI ● Post-GenAI

Which quarters saw the steepest change?

2022-Q4 is the largest single move

Are developed and emerging economies adopting at different rates?

Nearly identical, the adoption gap isn't where displacement risk hides.

Industries in Critical Gap

7 of 25

high risk, low investment

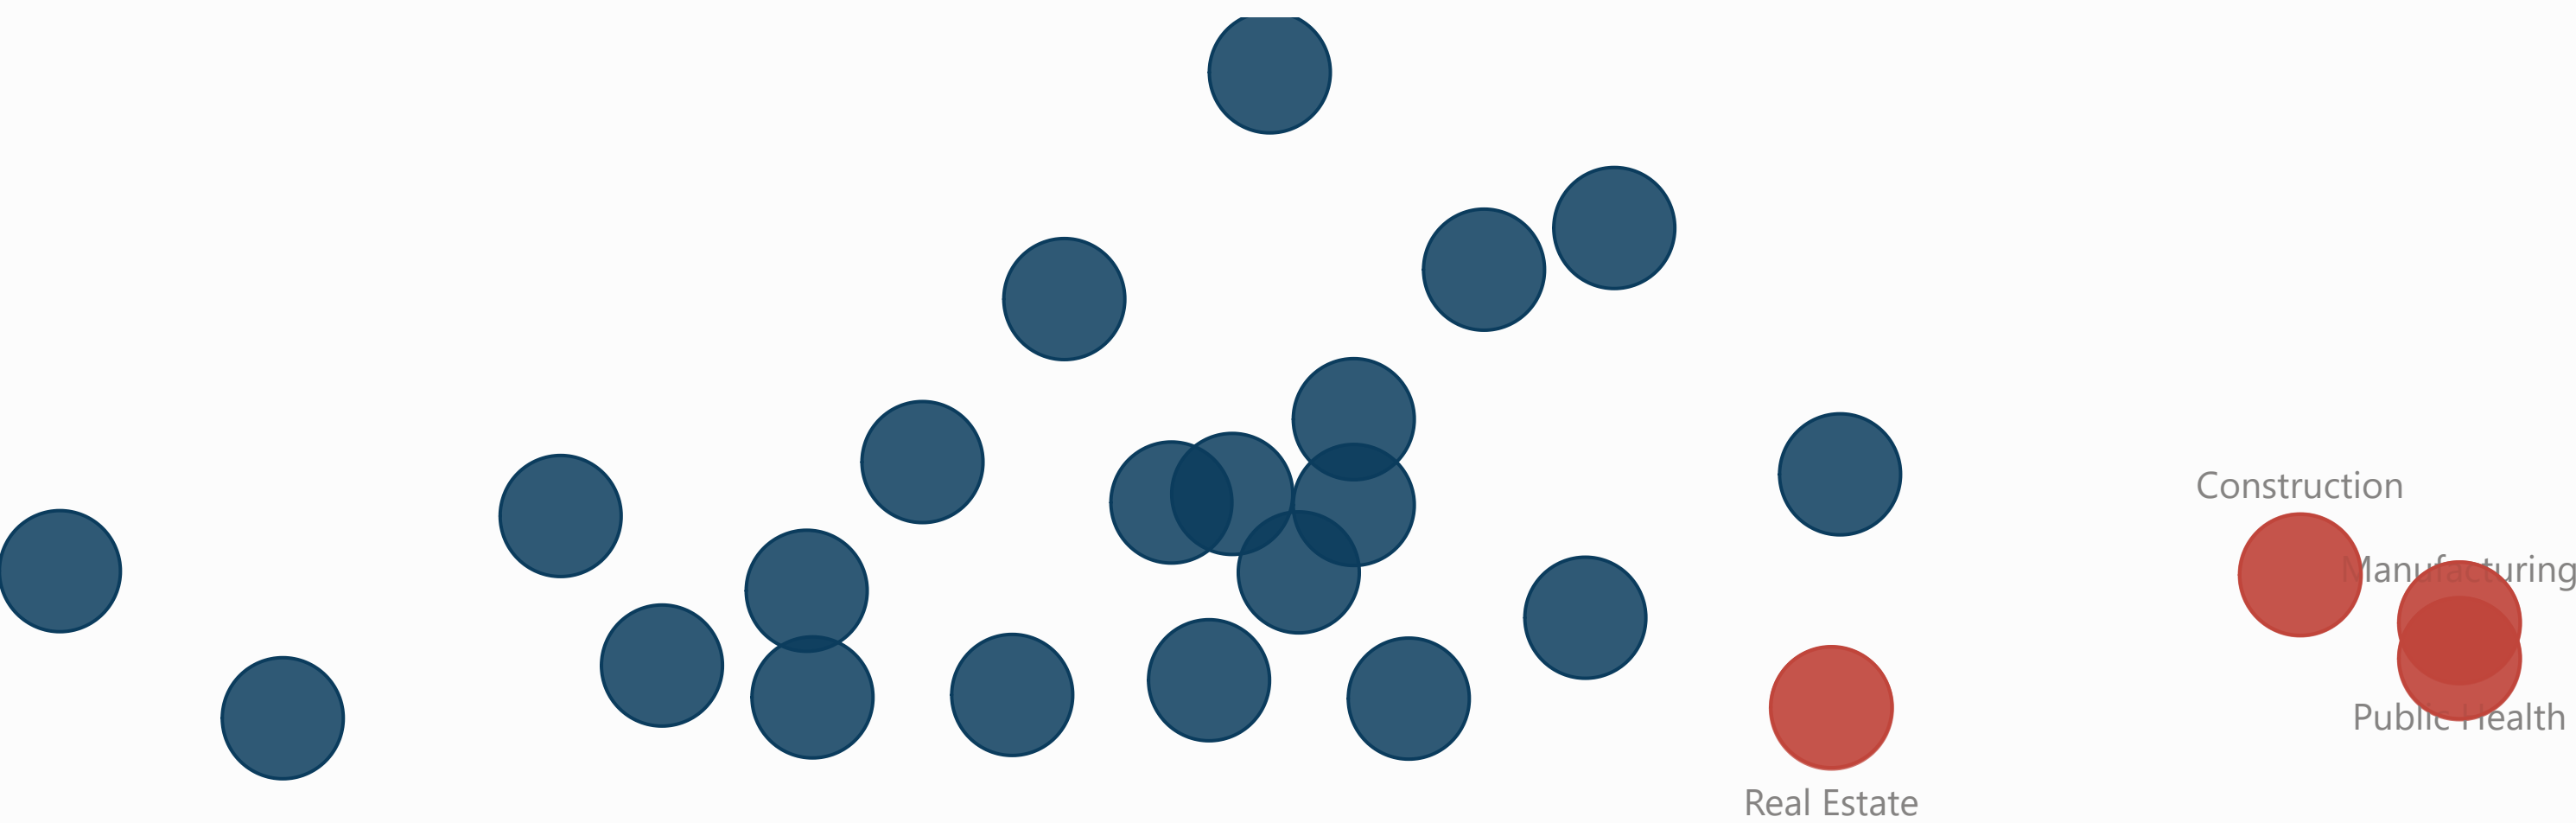

Total Reskilling Investment

\$61.7M

across all segments

Which industries are exposed but underinvesting?

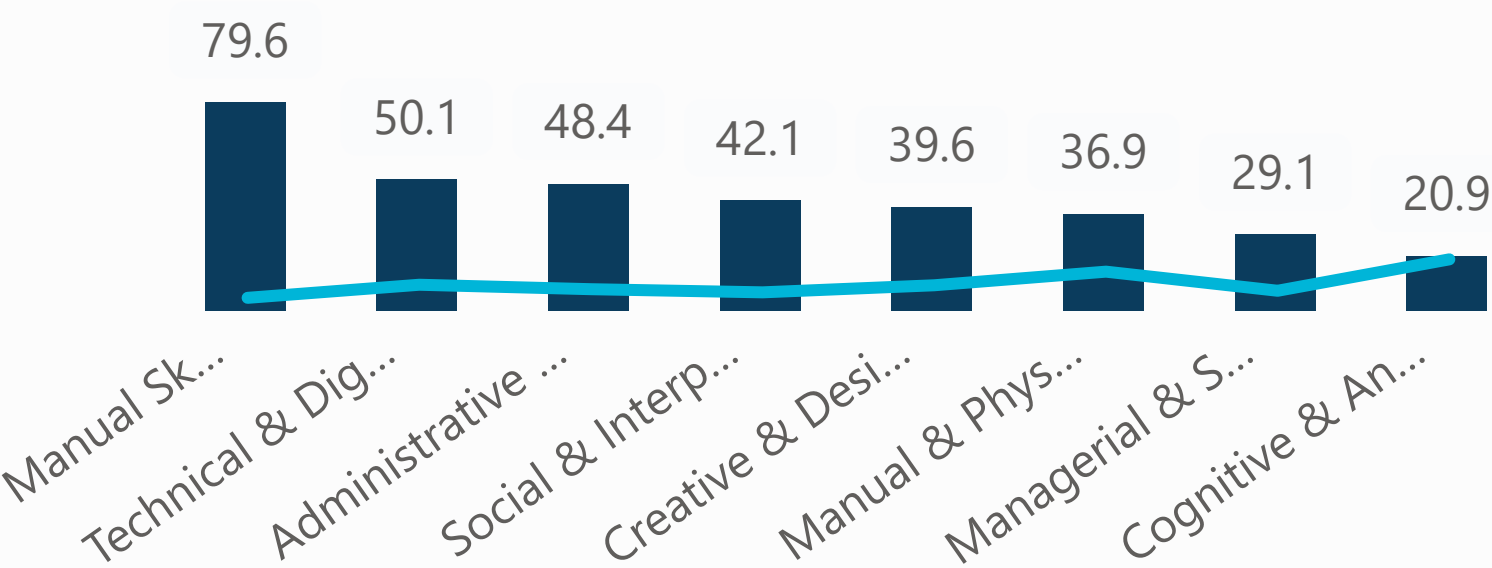

Manufacturing, Construction, Real Estate, and Public Health combine high exposure with underinvestment

Where does replaceability outpace our ability to reskill?

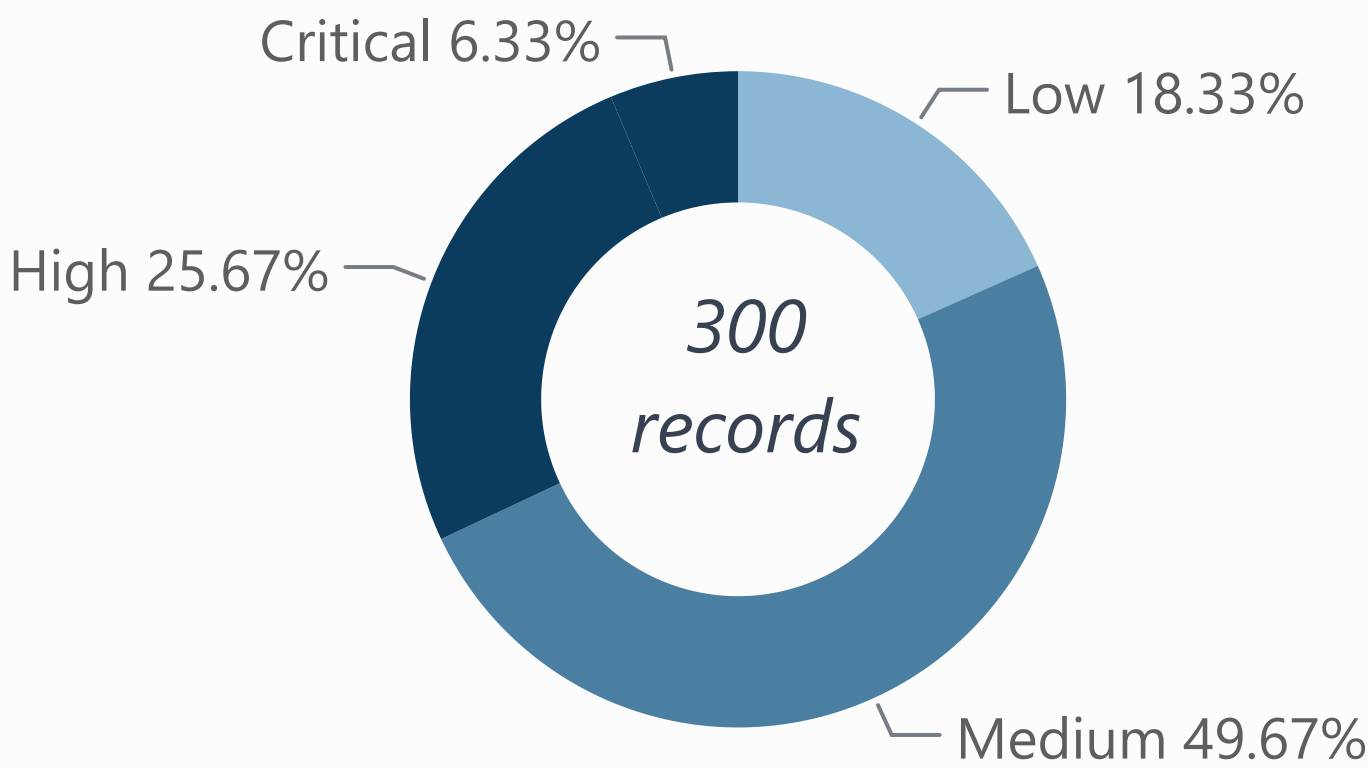

Nowhere actually, replaceability and reskilling speed run in opposite directions across categories.

● Avg AI Replaceability Score ● Avg Reskilling Duration Months

How exposed is the sample overall?

Half the sample sits in Medium risk, only 6% is Critical, but that's still 19 real records.

Priority list: risk vs. investment mismatch

Sorted by urgency, lower combined rank means higher funding priority.

Industry	Risk-Investment Mismatch Score	Reskilling Investment Rank	Displacement Risk Rank	Mismatch Tier
Media & Entertainment	9	1	8	Critical
Financial Services	13	3	10	Critical
Legal Services	16	2	14	Critical
Mining & Resources	17	6	11	Critical
Energy & Utilities	18	13	5	Critical
Agriculture	21	9	12	Critical
Professional Services	21	8	13	Critical

across 30 countries

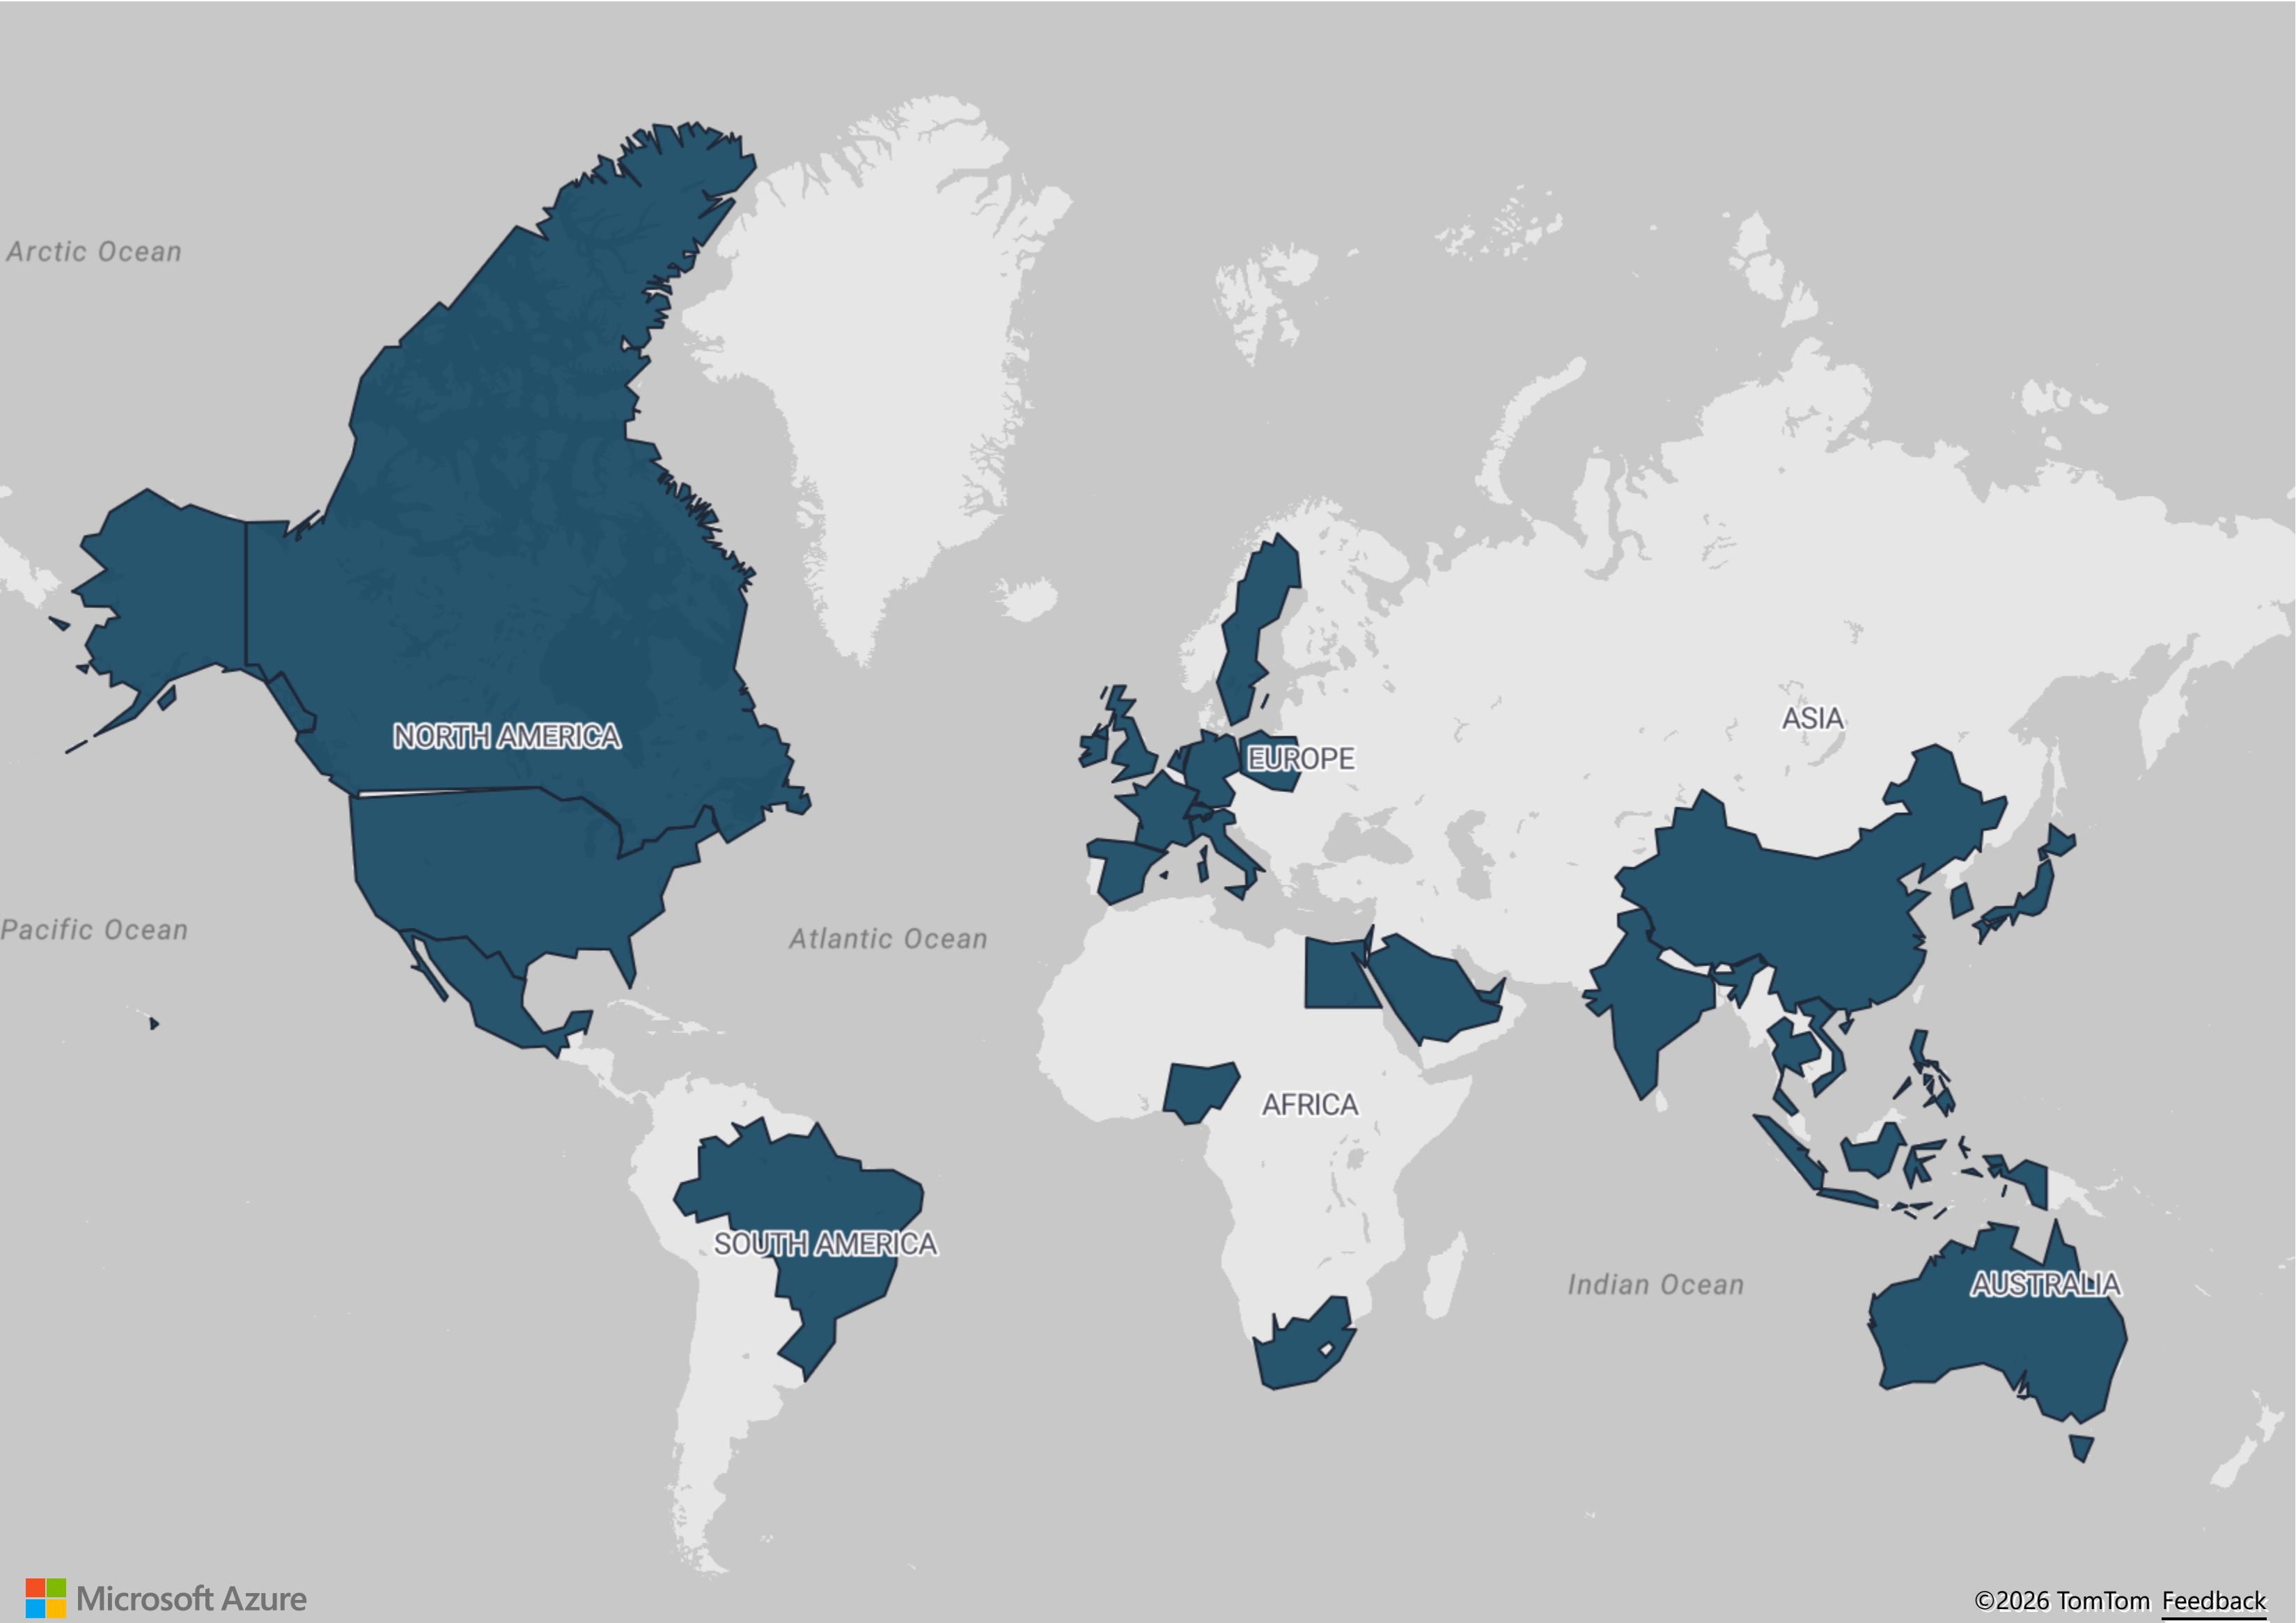

Reskilling \$ per Job Displaced

\$105

Global average

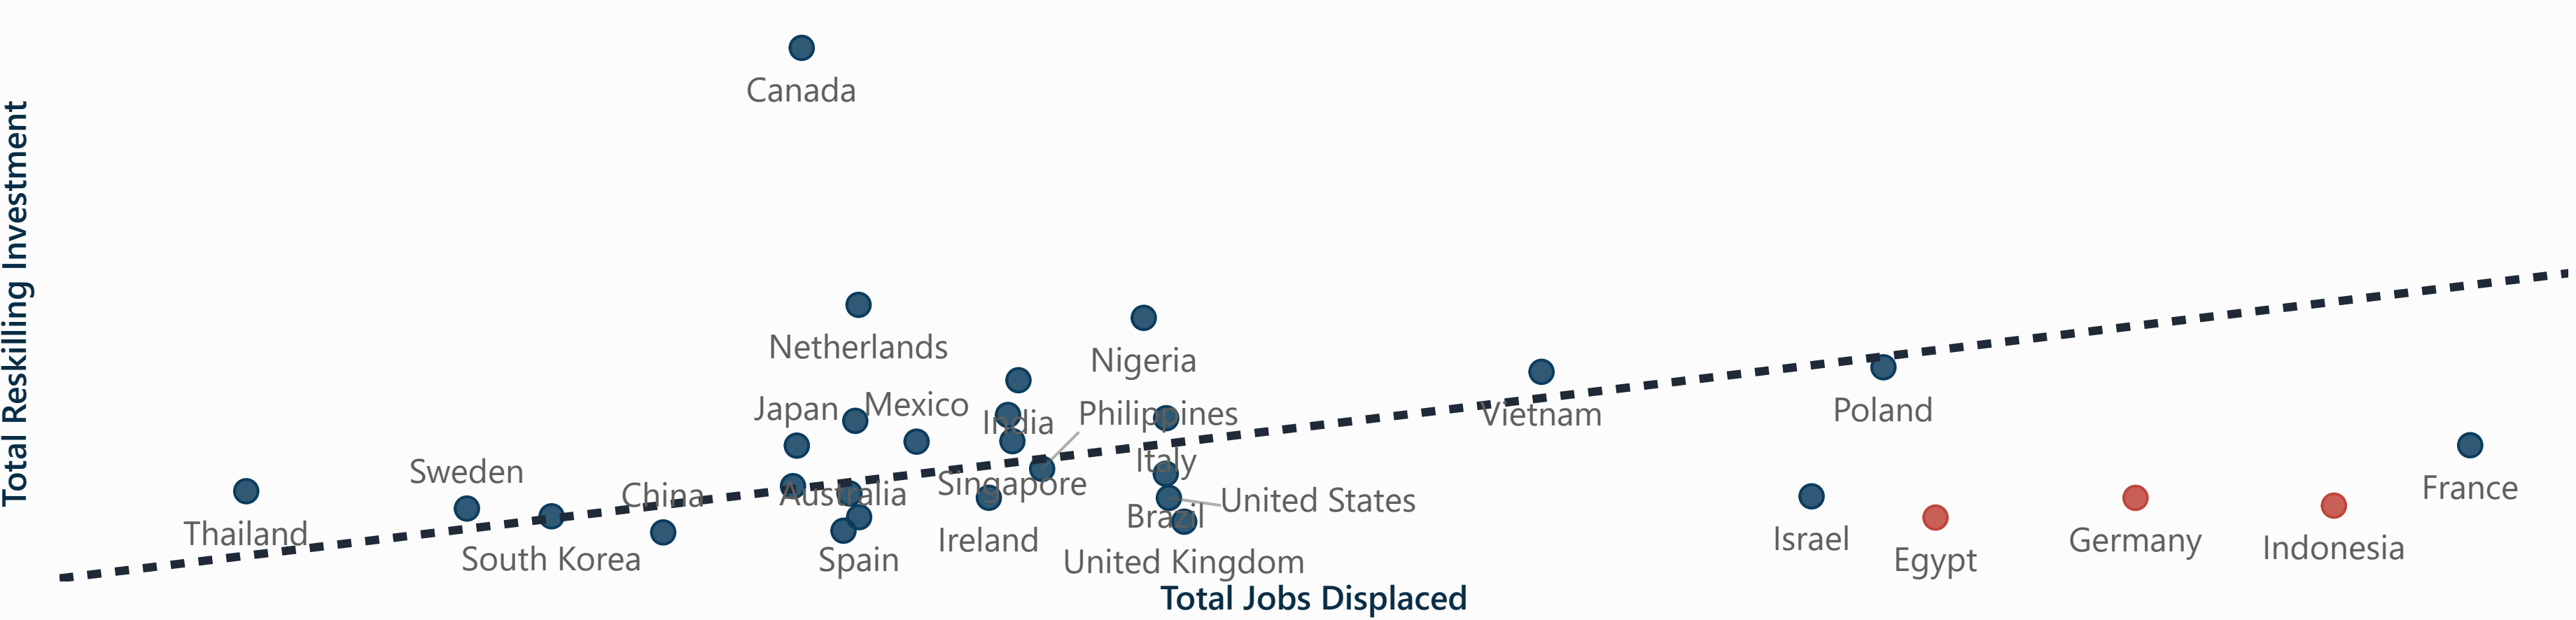

Is job creation keeping pace with displacement, anywhere?

No country reaches 1.0, job creation never fully offsets displacement, anywhere in the dataset.

Where is spend falling short of displacement?

Indonesia, Egypt, and Germany spend the least per displaced worker.

Findings & Recommendations

Priority industries

- **Media & Entertainment, Financial Services, Legal Services**, highest risk, lowest reskilling investment. First allocation tier.

Priority countries

- **India, Vietnam, Switzerland**, lowest job creation coverage. Second allocation tier.

Structural finding

- No country offsets displacement with creation. Coalition messaging should reframe funding as **mitigation, not prevention**.
